SUMMARY : In general, the knowledge of grape cultivation practices was medium among the growers and it could be enhanced by imparting training to the growers at their own villages through Govt., NGO's and SAU's Government and 'National Horticultural Mission' could also play a vital role in developing the processing units to utilize the raw material so that their income and interest could be developed to cultivate recommended grape varieties. Govt. machinery and extension workers may extend their expertise through 'Kisan Mela', 'Kisan Call Centres' and 'Choupal' like programmes for doing grape cultivation of improved varieties.
