Sensory evaluation of burfi prepared buffalo milk khoa blended with honey

S.N. WADHAVE, R.R. SHELKE, S.U. SURYAWANSH AND P.G. KOKATE

ABSTRACT...... Burfi was prepared from Buffalo milk blended with honey in the Dairy Technology laboratory of Department of Animal Husbandry and Dairy Science, Dr. Panjabrao Deshmukh Krishi Vidyapeeth, Akola. Burfi was prepared from five different combinations of Buffalo milk and honey i.e. 100:00 (T1), 96:04 (T2), 95:05 (T3), 94:04 (T4) and 93:07 (T5) was evaluated for various sensory attributes and it was found that burfi prepared from Buffalo milk khoa blended with 6 per cent honey was superior as compare to other treatments, considering the cost of ingredients it was found that cost of preparation of burfi was increased with increase in the rate of addition of honey but increase in cost of production can be compensate with value addition of honey in burfi.

KEY WORDS...... Buffalo milk khoa, Sugar, Honey, Burfi, Sensory evaluation, Economics
